

STATEMENT OF QUALIFICATIONS

Key Personnel

Resham Shirsat, LEED AP **Sustainability Project Associate**

Resham Shirsat is a LEED accredited professional with over three years experience as an environmental scientist in the environmental engineering and consulting industry. She has successfully conducted large scale remediation projects for government clients such as the Environmental Protection Agency (EPA), the Florida Department of Transportation (FDOT), and the Florida Department of Environmental Protection (FDEP). Her independent implementation and management of an extensive air monitoring and sampling effort for a year-long EPA Superfund project has solidified her skills data collection, analysis, and reporting.

In addition to her analytical skills, she has professional experience in public relations, marketing, and advertising specifically for green clients. She is able to communicate results in a logical and transparent manner, critical for successful stakeholder engagement, client relations and community outreach and education. Resham currently works with a team of nine at EcoAsset Solutions with an emerging specialization in corporate sustainability initiatives and life cycle analyses.
